Eurotherm

Action Instruments

Product Guide

...setting the standard

Eurotherm® Flexible Solutions

Eurotherm: a company that understands signal conditioning and isolating

For over 35 years Eurotherm has built an international reputation for developing premium quality "fit for purpose" products and solutions. The Eurotherm brands (Action Instruments, Barber-Colman, Chessell, Continental and Eurotherm) have long been recognised as the leaders in the industrial automation market.

Action Instruments provides the signal conditioning industry the highest quality, most innovative solutions to remote signal conditioning and isolation applications. Action defined the standard for accuracy and reliability and our focus on technological innovation continues to raise that standard. The people behind the Action Instruments brand are devoted to understanding your needs and overcoming obstacles to the collection and transmission of industrial automation process signals.

Easy Solutions to Tough Problems

Every Action product is designed for easy installation, operation and maintenance. Whether you are amplifying or splitting signals, conditioning sensor outputs, isolating grounding problems, or adding more drive to current loops, Action's complete product selection provides simple, convenient solutions to any analog signal conditioning need.

High Performance and Proven Reliability

Reliable signal processing under harsh conditions. That's what Action's products deliver. Nearly three decades of proven success can assure you of our adherence to the highest quality standards and the best in manufacturing techniques.

Real World Ruggedness

Action products are in tune with the industrial environment - the real world of hard-hats, forklifts, and EMI/RFI - they are ruggedised to survive the extremes of vibration, shock, temperature and humidity that are common to the manufacturing arena.

Action's Personal Commitment to Your Success

We know how tough it is on the plant floor and we realise that every application has different requirements. That's why Action's solutions are tailored to your problems.

Best Engineering Support in the Industry

Experienced, knowledgeable and friendly engineers are available throughout the world to answer your questions.

Think Reliable, Think Smart, Think Action

Our goal is to be your exclusive supplier for industrial measurement and control products. What can we offer you?

Plenty.

What do Action Products Do?

Isolation

A ground loop can occur if more than one ground connection is made to a single control signal. Because grounds are seldom at the same potential, an unwanted current will be generated and interfere with the control signal. Signal isolators break the ground loop current path and maintain the integrity of the measurement.

Signal Conversion

Industrial applications use a wide array of sensors to measure temperature, flow, length, speed, frequency, etc. These signals may then need to be converted into a form usable by the instrumentation to which they are connected. Any sensor signal (thermocouple, RTD, DC voltage, DC current, AC voltage, frequency, resistance, etc.) can be converted to any standard process signal.

Noise Filtering

Isolators incorporate low pass filters that eliminate high frequency EMI/RFI and unwanted signals from power lines, generators and motors.

Linearisation

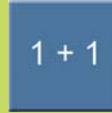

Many sensors output a signal that is not linearly related to the engineering value being measured. For example, a thermocouple used to measure temperature has a nonlinear millivolt output. A thermocouple input signal isolator translates this to a standard, robust linear signal such as 4 to 20mA.

Limit Alarms

Limit alarm units take in a process signal and compare it to one or more setpoints. They then provide an output signal, usually a relay contact, when the signal crosses the setpoint.

Math

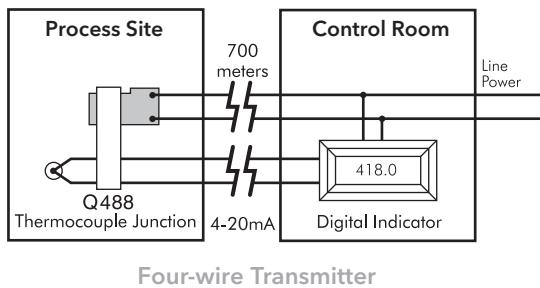

Isolators that can perform addition, subtraction, multiplication, division, square root, and averaging.

What is Signal Conditioning?

Signal conditioners are electronic instruments used in factory or machine automation. They can amplify, convert, boost, transform, buffer, filter, alarm and isolate process control signals. There seems to be no limit to the variety of things control engineers want to do with control signals. Signal conditioners are known by many names: converters, transducers, isolators, transmitters, and black boxes. Conventionally, most signal conditioners and isolators fall into two categories based on the number of wires required for power and signal.

Four-wire Transmitters

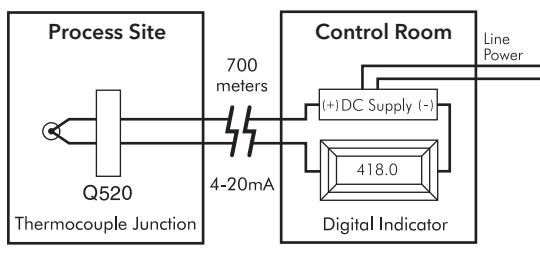

A four-wire transmitter has two wires for power and two wires for the signal output. A four-wire transmitter can be either AC or DC powered. Four-wire transmitters provide a powered output, either a voltage signal (e.g., 0-10V, 1-5V); a current signal (e.g., 4-20mA, 10-50mA); or in some cases a relay (e.g., solid state or contact closure). Four-wire transmitters require a power supply - they do not use power from the input or output signal lines. The power supply allows four-wire transmitters to power their output signal. Because of this, they are often used to boost signal strength for retransmission.

Four-wire Transmitter

Two-wire Transmitters

A two-wire transmitter is powered by the same two wires that carry the output signal. A two-wire transmitter is always DC powered and the output can only be a current signal, typically 4-20mA, or sometimes 10-50mA. The two-wire transmitter is considered a field device and requires very little power (milliwatts). It is therefore appropriate for hazardous (explosive) environments, such as chemical refineries and pharmaceutical plants. The low DC power requirement, which ranges from 10-48VDC at currents as low as 4mA, reduces the chances of an electrical spark causing ignition of flammable vapours or dust. Additionally, two-wire transmitters save on wire costs since both the signal and power are on the same wires. Locating a two-wire transmitter as far as 2000 feet from the control room is possible and at half the wiring cost of a four-wire transmitter. It is important to note that two-wire transmitters can be isolated or non-isolated. Many low cost

Two-wire Transmitter

two-wire transmitters are not isolated, which makes it important to ensure that the input sensor is not grounded. All of Action's two-wire transmitters are fully isolated. Members of this group include the TransPak™ series and most of the Q5xx products.

WV408 Ultra SlimPak II

Limit Alarms

Limit alarms are considered a four-wire transmitter since they have two wires for power and at least two wires for the relay signal output. Limit alarms are similar to a thermostat. On your thermostat at home you may have the temperature set to a cozy 72°F or 23°C. If the room temperature falls below that "setpoint" the heater will turn on. This is an example of on/off control. A limit alarm performs the same function. It has a setpoint which is compared to a process signal. If the temperature gets too high, the limit alarm is used to alert an operator or shut down the process. Other applications include limit alarms that can also act as backup for a control system to perform a controlled shutdown process in order to prevent damage or other hazards.

Digital Indicators

Digital indicators (or panel meters) will also accept direct sensor inputs. For the most part, AC powered indicators can be considered a four-wire transmitter if they are configured with an analog or relay output. Indicators are most commonly used to display process variables, however some have secondary functions, such as a 4-20mA transmitter output, limit alarm, or relay contact closure output.

Ultra SlimPak™ II

DIN Rail Mount Signal Conditioners, Isolators, Alarms, & Power Supplies

- Ethernet Connectivity to Most Client Software
- Built In Web Browser with Email and Logging Capability
- PC or Button Setup and Calibration
- Smart Power Technology Automatically Adjusts Power
- High Density Modules
- Reduced Wiring with Jumpers Transferring Power from Module to Module
- Removable Connectors
- Fast Response and High Accuracy
- In-Process Calibration

SPECIFICATIONS

Isolation:	1800VDC or peak AC between input, output and power
Operating Humidity:	15 to 95% @ 45°C
Temperature Range	
Operating:	0 to 60°C
Storage:	-20 to 85°C
Power Consumption:	1.5W typical, 2.5W max.
Supply Range:	9 to 30VDC
Agency Approvals:	UL; CSA; CE;
(WV408/428 only):	Class 1, Div 2, Gp A, B, C, D to 60°C ambient

Ultra SlimPak™

DIN Rail Mount Signal Conditioners, Isolators, & Alarms

- Field Configurable
- Wide Ranging
- High Density DIN Rail Mount
- ASIC Based Design for Maximum Reliability

Ultra SlimPaks are high density, DIN Rail mount, setpoint limit alarm and isolating signal conditioner modules. All Ultra SlimPak modules utilise Action's advanced, ASIC-based design for field configurable input and output flexibility.

SPECIFICATIONS

Isolation:	1800VDC between input, output and power (except G438)
Operating Humidity:	15 to 95% @ 45°C
Temperature Range	 Operating: 0 to 55°C Storage: -25 to 70°C
Power Consumption:	1.5W typical, 2.5W max.
Supply Range:	9 to 30VDC (except G448 is 18 to 30VDC)
Agency Approvals:	UL; CSA; CE

ActionI/Q™

DIN Rail Mount Signal Conditioners, Isolators, & Alarms

The ActionI/Q Series of signal conditioners have wide ranging field configurable inputs and outputs. These DC, RTD, T/C, potentiometer, bridge/strain gauge, AC and frequency input devices incorporate TouchCal™ technology, which simplifies calibration and allows more than 90% adjustment of zero and span.

- Multi-channel Conditioners
- Two-Wire Transmitters
- SnapLoc Terminal Blocks
- Removable Connectors
- Interlocking Modules
- Optional I/Q Rail Power Bus
- PC Based Setup
- Math Modules

SPECIFICATIONS

Isolation:	1800VDC or peak AC between input, output and power

* The Q498 is a DC powered, DIN rail mount, DC input signal conditioner. The unit is fully isolated to 1800V between input, output and power. Two isolated analog inputs each accept either a DC voltage or current. One analog output delivers either DC bipolar voltage or unipolar current. The Q498 also has a separate frequency input channel and a frequency output, as well as a discrete input and output channel.

The Q498 can perform single or double input math calculations on the input values. The available operators are Addition, Subtraction, Multiplication, Division, Square Root and Average. Process control functions include Hi/Lo Select, Rate of Change Limiter, and Track & Hold. The frequency input can also have the math functions applied. A 25-point Linearisation function is available for Channel 1 Analog input only. All output math and process control functions require C698-0000 software.

TransPak™ T280

Isolating 2-Wire Transmitter for
Pt100 RTD, Thermocouple, & mV

- Miniature, Thermal-Head Mounted
- 1000VDC Input to Output Isolation
- Cost Effective Fixed Inputs
- Eliminates Ground Loops
- Hinged Cover Protects Potentiometers
- Embedded Terminals

SPECIFICATIONS

Input Types

Thermocouple: B, E, J, K, L, N, R, S, T
RTD: Pt-100, 2-wire or 3-wire
mV: 100mV max.

Input Span

Thermocouple: 5mV min. span
RTD: 20°C min. 500°C max.
mV: 5mV min. span

Adjustability: ±15% for both zero & span

Output Span: 4-20mA, limiting @ <28mA

Isolation: 1000VDC

Supply Voltage: 10 to 40VDC, polarity protected

Operating Temperature: -20 to +70°C

Agency Approvals: CE

TransPak™ T287

Programmable Isolating Universal
Input 2-Wire Transmitter

- PC Based User Friendly Configuration
- 2000VDC Input to Output Isolation
- Universal Input Reduces Inventory
- Custom Linearisation for Special T/C Types and Math
- Single or Dual Inputs
- DIN Rail Mounting Adapter Included

SPECIFICATIONS

Input Types

Thermocouples: Most standard types & all special types using customer defined tables & polynomials

RTD: 2-, 3- & 4-wire, Pt-100, Ni-110, Ni-120 and other RTDs. Includes Callendar-Van-Dusen adaptation and custom sensors Linearisation with user defined tables and polynomials

DC mV: -10 to 100mV

Potentiometers: 0 to 20k Ohms

Resistance: 0 to 400 Ohms

Infrared

Minimum Range: 2mV

Output: 4-20mA

Supply Voltage: 9-40VDC @ no load, polarity protected

Operating Temp: -40 to 85°C

Isolation: 2000VDC, input to output

Calibration: Unit includes all calibration parameters, performs periodic zero and span self-test, and auto calibration

Agency Approvals: CE

ORDERING INFORMATION

Specify:

T280-1xxx-C (F): for RTD Input
T280-2xxx-[tc type] C (F): for thermocouple Input
T280-3xxx: for mV Input

Accessories:

T25H-0000: Headmount enclosure - 1/2 NPT for thermowell and conduit.
AP9046: ActionPak 24/40VDC, 65mA Loop Power Supply

ORDERING INFORMATION

Specify:

1. Model: T287-0000
2. Model: C680-0001 Isolated Communications Adapter, Configuration and Calibration Software, and User's Guide

Accessories:

T25H-0000: Headmount enclosure - 1/2 NPT for thermowell and conduit
AP9046: ActionPak 24/40VDC, 65mA Loop Power Supply
C680-0002: Zero/Span Trimmer

VisiPak™ V108, V116 & V132

Temperature/Process Indicators

- Field Configurable Input for Thermocouple, RTD, mV and mA
- 3 Field Configurable Alarm Setpoints with 1 or 2 Alarm Outputs
- Bright Green 4-Digit (9999) LED Display, Programmable for Engineering Units
- Combination Alarm Functions, Alarm Blocking and Programmable Latching/Non-Latching
- IP65 Front Panel with Tactile Configuration Buttons
- Standard Power Supply 85 to 264VAC, 48 to 62Hz or Optional 20 to 29VDC/VAC (n/a on V108)

VisiPak™ V408

Universal Temperature/Pressure/Process Indicators

- Universal Field Configurable Input for Thermocouple, RTD, mV and mA, Bridge, and 0 to 10V Signals
- Modular Design Provides 3 Option Slots plus 1 Optional Modbus Communications Slot
- Option Modules for 2nd Input, DC Retran, Sensor Excitation, 3 Digital Inputs/Outputs, and Relays
- 4 Field Configurable Setpoints Support Combination Alarm Functions, Rate of Change, Deviation Alarms, Alarm Blocking and Latching/Non-Latching
- IP65 Front Panel with Plug In from Front Design for Quick Replacement
- Standard Power Supply 85 to 264VAC, 48 to 62Hz or Optional 20 to 29VDC/VAC

ORDERING INFORMATION

Specify:

V108-ALGNVH	1/8 DIN, Green LED Display, 85-264 VAC PS
V108-ALRDVH	1/8 DIN, Red LED Display, 85-264 VAC PS
V116-ALVH	1/16 DIN, Green LED Display, 85-264 VAC PS
V116-ALVL	1/16 DIN, Green LED Display, 20-29VDC/VAC PS
V132-ALVH	1/32 DIN, Green LED Display, 85-264 VAC PS
V132-ALVL	1/32 DIN, Green LED Display, 20-29VDC/VAC PS

Accessories:

SUB2-1V1	0 to 10V Input Adapter
SUB2-1R7	External Relay (V116 and V132 only)

(All units ship with mounting brackets, a 2.49 ohm shunt resistor, and a user manual.)

ORDERING INFORMATION

Specify:

V408-ALGNVH	1/8 DIN, Green LED Display, 85-264 VAC PS
V408-ALGNVL	1/8 DIN, Green LED Display, 20-29VDC/VAC PS
V408-ALRDVH	1/8 DIN, Red LED Display, 85-264 VAC PS
V408-ALRDVL	1/8 DIN, Red LED Display, 20-29VDC/VAC PS

Accessories:

SUB2K-D5	2nd Input
SUB2K-D6	DC Retran
SUB2K-R4	Form C Relay
SUB2K-TK	Triple Contact Input
SUB2K-TL	Triple Logic Input
SUB2K-TP	Triple Logic Output
SUB2K-RR	Dual Relay
SUB2K-LR	Logic Relay
SUB2K-A2	232 Communications
SUB2K-F2	422 Communications
SUB2K-Y2	485 Communications
SUB2K-MS	24VDC, 20mA Excitation
SUB2K-G3	5VDC Transducer Excitation
SUB2K-G5	10VDC Transducer Excitation

(All units ship with mounting brackets, a 2.49 ohm shunt resistor, and a user manual.)
